Gentlemen:

Here is the tentative agenda for the WAIS/Z39.50 Meeting.
Eliot and Tim have been invited but I do not yet have
a response from them on their participation.

As of today we have folks coming from DOE Program Offices,
several national laboratories, a couple of universities,
and (I think) representatives from some of the information
management organizations of other Federal agencies.

It is shaping up to be a larger meeting than I originally
anticipated...but that is great! You will probably each
receive a more formal letter in the next couple of weeks.
Until then, this is the way things look.

Although I have essentially given each of you an entire
morning or afternoon, we might want to include a little
time in each morning and afternoon period for individuals
attending to say what they are doing with WAIS. Almost
everyone coming is doing something.

Just a thought.

I am open to comments, suggestions, recommendations. How
does this look to each of you?

Charlynn.

WAIS/Z39.50 MEETING
APRIL 6-8, 1993
OFFICE OF SCIENTIFIC AND TECHNICAL INFORMATION
175 OAK RIDGE TURNPIKE
OAK RIDGE, TN

The purpose of the WAIS/Z39.50 meeting is to bring together interested
parties from various elements of DOE and the DOE contractor community,

along with interested parties from other Federal agencies and the academic community, for a discussion and exchange of ideas relative to WAIS, Z39.50, and related issues. The following draft agenda is based on the known and expressed interests of the parties planning to attend.

In particular, I have tried to allow ample time for thorough presentations on, and discussion of: WAIS (Presenter: Brewster Kahle), the Clearinghouse for Networked Information Discovery and Retrieval (Presenter: Jim Fullton), and Access, Security, Authentication, and Authorization (Presenter: Wayne Allen), and [hopefully] the USGS WAIS Initiatives (Presenters: Eliot Christian and Tim Gauslin)

Of equal importance are the Thursday morning presentations on various projects on-going within the Department. Each of these activities could potentially benefit from the application of WAIS and/or Z39.50-type implementations. This session will be an important opportunity for a complete airing of the issues, problems, and challenges facing these "real-world" Department projects.

TENTATIVE AGENDA

TUESDAY, APRIL 6

1:00 WELCOME AND INTRODUCTIONS

1:30 WAIS (Brewster Kahle)

 ...History of WAIS

 ...Current Status of WAIS, Inc.
